Subject:

20-001383

On 01/28/2022 while inspecting the weapon lockers in the police department garage, I discovered a white envelope in locker #1 that was marked "Evid" with an associated case number of 20-001383. The envelope did not contain any further information and was not accompanied with a property sheet. I cross referenced the case report number and discovered that the property inside the envelope was a white powder substance and related to a hit and run investigation from 07/27/2020 that Chief Colatorti had been assigned to.

The narrative on the SR1050 report indicates that further investigation would follow. However, no additional reports were found regarding any subsequent investigation. The envelope containing the property was placed into the property room and a formal property sheet was completed.
